

# Digital Marketing Audit Checklist

A practical review framework for identifying marketing gaps before making additional investments.

## How to use this checklist

Review each area before increasing marketing spend. Mark items that are complete, need attention, or require deeper analysis. Use the notes area at the end to turn observations into an action plan.

### 1. Strategy & Business Objectives

- Business goals are documented in measurable terms.
- Primary marketing objectives are tied to business outcomes.
- Target customers and priority segments are clearly defined.
- Core value proposition is clear and differentiated.
- Primary offers, services, or products are easy to understand.
- Marketing channels have a defined purpose rather than operating independently.

### 2. Audience & Positioning

- Ideal customer profile is documented.
- Customer pain points, needs, and motivations are understood.
- Messaging reflects customer language and priorities.
- Brand positioning is consistent across major touchpoints.
- Calls to action match the customer's stage of consideration.

### 3. Website & Conversion

- Website is mobile responsive.
- Primary pages load quickly and function correctly.
- Navigation is clear and intuitive.
- Important services/products are easy to find.
- Primary calls to action are visible and understandable.
- Forms, contact paths, and conversion actions work.
- Trust signals, proof, policies, and contact information are present.
- Analytics and conversion tracking are implemented.

## 4. Search & SEO

- Important pages are indexable and accessible to search engines.
- Page titles and meta descriptions are useful and descriptive.
- Headings provide a logical content structure.
- Internal links connect related pages.
- Target search topics align with customer intent.
- Local business information is consistent where applicable.
- Structured data is appropriate and valid where applicable.
- Search performance is reviewed using relevant tools and reports.

## 5. Social Media & Content

- Business profiles are complete and consistent.
- Profile links and contact paths work.
- Content serves defined audience needs or business objectives.
- Posting cadence is realistic and sustainable.
- Content includes useful calls to action where appropriate.
- Brand voice and visual identity remain consistent.

## 6. Advertising & Acquisition

- Campaign objectives are clearly defined.
- Targeting is appropriate for the offer.
- Landing pages match ad messaging.
- Conversion tracking is tested before optimization.
- Budget assumptions are documented.
- Campaign performance is evaluated against business outcomes.

## 7. Analytics & Measurement

- Analytics property and data streams are configured correctly.
- Key events and conversions are defined.
- UTM or campaign naming conventions are consistent.
- Reporting focuses on actionable KPIs.
- Lead quality and downstream outcomes are considered.

■ Marketing decisions are informed by reliable data.

## Priority Action Notes

| Finding / Gap | Priority | Next Action / Owner |
|---------------|----------|---------------------|
|               |          |                     |
|               |          |                     |
|               |          |                     |
|               |          |                     |
